

PROFILE

University graduate and multi-skilled technology professional with 5+ years of practical experience across software development, graphic design, and data-focused projects. I create polished digital products that combine strong visuals, usability, and real problem solving.

EXPERIENCE

2020 - Present | Software Developer & Graphic Designer

Develop responsive websites, business systems, social media creatives, flyers, and client-ready digital materials.

2021 - Present | Data Analysis & Reporting

Use Python, Pandas, SQL, and charts to analyze data, track performance, and communicate insights clearly.

Frontend UI Implementation

Turn concepts into polished interfaces with a focus on modern design, responsiveness, and presentation.

EDUCATION

University of Cape Coast

Information Technology - completed university education with training in software development, databases, and practical computing.

PROJECT HIGHLIGHTS

- **Business Registration System**
React, CSS, SQL
- **Sales Analytics Dashboard**
Python, Pandas, Matplotlib
- **Brand Identity & Social Media Design**
Photoshop, Canva
